About The Program

This program has been designed for you if you are leading a safety organization that aspires to transform or would like to develop the next cohort of safety leaders that will take your organization. Through this course, participants will deep dive into the skill of demonstrating Safety Leadership during their daily duties. Sustaining a risk-averse culture comes as a challenge when our workforce is diverse. This program will enable the leadership teams to make conscious decisions to make this journey of safety excellence a successful one.

This two-day program on safety leadership development aims to:

- Learn & Reflect on one's leadership capabilities through the Felt-leadership program
- Understand the fundamentals of Process Safety Management
- Dive into the experiential learning Safety Leadership Development Centre, a state-of-art facility
- Understand TSL's Safety System and processes to control risks across the organisation

Pedagogy

The Certificate Program in Safety Leadership Development is a hybrid program with both on-site and off-site training modules. The program consists of a series of interactive sessions, strategic thinking and focused discussions on the safety concerns of an organization and how to improve the Safety Culture. The program aims at enabling the learners to become role models themselves and propagate the same to the last person on the shopfloor.

Participants are provided with opportunities discuss their Safety Journeys and reflect on the learnings.

Our learning model encompasses:

Classroom Training on
Felt-leadership

Strategic Risk
Thinking Models

Collaborative
learning approach

Walk-through the state-of-art
facility at Safety Leadership
Development Centre

Ideal For

- » Senior Leadership Team across organizations
- » All managers responsible to develop safety culture in their organisation.

Faculty Profile

- » Faculties have 20+ years of experience in Tata Steel's safety management systems, Expertise and strong domain knowledge in Safety

Leadership Quote

Rajiv Mangal

Vice President-Safety, Health & Sustainability Tata Steel

Building a culture of risk intelligence has become essential for hazardous industries like ours. In our journey of Zero Harm, strengthening our safety standards and increasing risk perception of our workforce will remain our crucial touchpoints.

T V Narendran

CEO & MD Tata Steel

We are committed to 'Zero Harm' and are constantly driving safety consciousness in the Company. Our journey of safety excellence is powered by enabling policies, a robust management system framework and a sound safety governance structure.

Our program stands at an impression 4.7/5 rating
